

F16 OIL

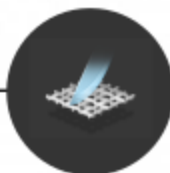

FINISHING

GRIP-SUPPORT technology provides additional support at work. The wide, spacious cuff allows you to slip the sleeve inside the glove for even more protection from injury.

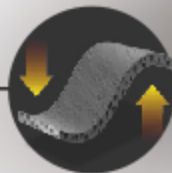

INSERT

ANTISLASH
Combination of professional anti-cutting protection with high wearing comfort.

COATING

F-NITREAL is an innovative technology based on pure, no-fill, slightly foamed nitrile which provides high grip and breathability of the glove.

CHARACTERISTIC

Gloves provide high abrasion resistance and excellent ventilation thanks to a special breathable structure of coating. Free of toxic ingredients, the insert guarantees complete comfort and safety of use.
